Professional Summary

Full-stack engineer with 6 years of Laravel and PHP experience. At CoreProc since 2024, I have shipped features across 12 client applications and written 2,000+ commits, covering retail loyalty, field sales, payments, e-commerce and SaaS.

I lead features from requirement to production. I write design specs and test plans before coding, debug and fix production incidents, solve performance problems at the query and queue level, and build integrations with Salesforce, PayPal, PayMaya, Google SSO and SFTP data feeds. Already working at a senior level: I own system design, set code quality standards through PR reviews, and onboard new developers.

Technical Skills

Backend: PHP 8, Laravel (5.8–12), Laravel Nova, Laravel Horizon and queues, REST APIs, CodeIgniter 4, NetSuite SuiteScript 1.0/2.0

Frontend: Vue.js 2/3, Inertia.js, JavaScript, Tailwind CSS, jQuery, Axios, HTML5, CSS3

Data: MySQL (views, query optimization, N+1 elimination), Redis, multi-tenant databases, bulk CSV/Excel import and export, Power BI data feeds

Integrations: Salesforce, PayPal subscriptions, PayMaya, Google OAuth/SSO, Firebase Cloud Messaging, SFTP data ingestion, AWS S3, MinIO

DevOps and quality: Docker, Jenkins, CI/CD pipelines, Git (GitHub, GitLab, Bitbucket), PHPUnit, PHPStan, PHP_CodeSniffer, Laravel Pint

Ways of working: Agile/Scrum, Jira, technical design specs, code review, QA test plans, AI-assisted development (Claude Code, AI agents)

Professional Experience

CoreProc Inc. Full-Stack Developer

Feb 2024 - Present | Taguig City (Remote)

- Reviewed pull requests across client projects and **onboarded** new developers to the codebase, Docker setup and team conventions.
- Led delivery of a payments reconciliation system from setup to production, covering PayMaya, SFTP kiosk and mobile-transaction matching, scheduled imports, and CI quality gates.
- Set the **planning standard** on a multi-tenant field-sales platform for a multinational FMCG client by writing design specs, implementation plans and QA test plans before coding.
- Diagnosed and fixed production incidents, including a login redirect broken by a library upgrade, failed data sync for multi-district supervisors, and PesoPay and PayPal payment failures.
- Eliminated N+1 queries across 26 BI export processors and **resolved** export timeouts with queued, chunked jobs.
- Owned a wholesaler performance portal and a team-collaboration SaaS as top contributor, shipping dashboards, Salesforce integration, Google SSO and PayPal subscriptions (Laravel, Inertia.js, Vue).
- Championed AI-assisted development with Claude Code skills for PR drafting, QA schema repair and ERD generation.

Dinoland Full-Stack Developer (Contract)

Oct 2023 – Feb 2024 | Makati City

- Designed and built a ticket management system in Laravel and jQuery, covering ticket status tracking, purchase orders, revenue reports and a user activity audit trail.

Cloutech ERP Technical Consultant

Oct 2022 – Oct 2023 | Makati City (Hybrid)

- Built custom NetSuite features in SuiteScript 1.0 and 2.0, including templated check printing for invoices and accounts receivable. This made clients' payment processing 50% more efficient.
- Turned client finance requirements into technical specifications, acting as the link between business users and the development team.

DOST-PCIEERD Information Analyst II

Nov 2021 – Nov 2022 | Taguig City (Remote)

- Automated the project-expense approval workflow in the agency's Laravel project management system, cutting approval processing time by 60%.
- Built project timeline tracking that flags overdue milestones. Deadline tracking was 90% accurate across the project portfolio.
- Rebuilt search across 1,000+ approved projects, cutting search time by 70%.

Philippine Statistics Authority (PSA) Information Analyst I

Mar 2021 – Nov 2021 | Quezon City

- Led the move from paper to digital forms for the Family Income and Expenditure Survey (FIES), raising survey completion rates by 50%.
- Built an online science quiz bee system in CodeIgniter 4 with real-time scoring and Wi-Fi latency monitoring for fair live competition.

Philippine Christian University Junior Web Developer (Contract)

Nov 2020 – Mar 2021 | Dasmariñas, Cavite

- Built an online student guidance system in Laravel 8.
- Added QR-code employee attendance, improving attendance accuracy by 30% during COVID-19 restrictions.

Selected Projects

- **Multi-tenant field-sales platform:** per-tenant activity data, nightly BI exports to S3/Power BI, mobile data sync for field supervisors. Laravel, Nova, MySQL, Redis, S3. Core developer (#2 by commits); design specs, performance fixes.
- **Payments reconciliation system:** matching PayMaya, kiosk cash (SFTP) and mobile-app transactions. Laravel, Nova, scheduled jobs, SFTP. Built most of it (97 of 107 commits).
- **Team-collaboration SaaS:** sign-up, SSO, paid subscriptions, team credits. Laravel, Inertia.js, Vue 3, PayPal. Top contributor (600+ commits).
- **Wholesaler performance portal:** sales targets, dashboards, Salesforce data, bulk import/export. Laravel, Inertia.js, Vue, MySQL views. Top contributor (300+ commits).

Education

Bachelor of Science in Information Technology Cavite State University (Main Campus), Indang, Cavite

Aug 2016 – Aug 2020
